

## **VII. Database of the ethnological specimens related to natural history**

In the following plates we show the photographs and the descriptions of the ethnological specimens related to natural history.

The first part of the plates (76–170pp) includes the specimens of crude drugs, grains, beans, tools and so on. The second part (171–176pp) includes those of copper alloys and the third part (177–196pp) includes the specimens transferred from REM to RGM.
